

RISK ASSESSMENT REPORT

MANDATE DETAILS

Fund Name	Investment
Strategy Type	buyout
Vintage Year	2026
Primary Analyst	gowshi
Description	Generate mandate criteria

OVERVIEW & ASSESSMENT

This comprehensive risk assessment report covers the entire investment process across three critical stages:

1. SOURCING STAGE:

Identified and evaluated 29 potential investment opportunities across multiple sectors and geographies.

2. SCREENING STAGE:

Screened 18 companies against mandate criteria and strategic fit metrics.

3. RISK ASSESSMENT STAGE:

Conducted detailed risk analysis on 18 companies. 16 companies (88.9) passed all risk parameters. 2 companies require attention.

EXECUTIVE SUMMARY:

Our sourcing strategy targeted technology-oriented growth and enterprise software opportunities, yielding 29 candidates drawn largely from the Technology sector and prioritized by market relevance, product roadmaps, and recent filing vintages; this focused market identification enabled an efficient funnel into screening. The screening stage materially narrowed the opportunity set from 29 to 18 candidates and produced a uniform pass outcome (18/18), demonstrating screening efficiency in advancing a concentrated group for detailed assessment but also suggesting the need to recalibrate screening thresholds since every screened candidate passed. The subsequent risk assessment of those 18 companies produced an 88.9 success rate (16 passed, 2 failed), with the two failures stemming from deficiencies in competitive position an outcome that highlights a discrete yet material vulnerability that the earlier screening did not fully surface. Taken together, sourcing concentrated high-conviction technology names, screening delivered a tight shortlist, and risk assessment exposed competitive-position weaknesses in two specific holdings (DXC Company and FLEET Technologies, Inc.), leading to their recommended exclusion from deployment. Investment recommendation: proceed to allocate selectively into the 16 risk-approved companies subject to standard position limits, enhanced competitive-position due diligence, and defined entry/exit triggers, while explicitly excluding the two failed names. Finally, be mindful of portfolio concentration risk the current pipeline and approved universe are heavily technology-biased so we recommend portfolio diversification limits or hedging strategies to manage sector concentration while capturing the identified opportunities.

EXECUTIVE SUMMARY

Metric	Value	Percentage
Total Companies	18	100%
Companies - SAFE	16	88.9%
Companies - UNSAFE	2	11.1%

CRITICAL RISK PARAMETERS

1. **Competitive Position: Affects 2 company(ies)**

Impact: Portfolio concentration risk

RISK ASSESSMENT RESULTS

1. SalesFX

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

2. Service Inc - 2024

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

3. Workday - 2025

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

4. Micro Corporation

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

5. International Machines - 2024

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

6. Techno Inc

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

7. The Trade Desk

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

8. Atlassian Corp Plc

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

9. DXC Company

Overall Assessment: x FAILED | **Parameters:** 0 passed, 1 require attention

Parameter Analysis:

1. Competitive Position [UNSAFE]

Described as service type, not indicating dominant or strong market presence.

Recommendation: REQUIRES REMEDIATION

10. VM, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

11. Cogs Solutions Corporation

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

12. Fintech, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

13. National Information Services, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

14. Broad Financial Solutions, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

15. Leidos, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

16. FLEET Technologies, Inc.

Overall Assessment: X FAILED | **Parameters:** 0 passed, 1 require attention

Parameter Analysis:

1. Competitive Position [UNSAFE]

No indication of dominant or strong market presence; description lists product scope.

Recommendation: REQUIRES REMEDIATION

17. Zoommin Communications, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

18. DocAV, Inc.

Overall Assessment: ✓ PASSED | **Parameters:** 1 passed, 0 require attention

Parameter Analysis:

Note: 1 additional parameter(s) met mandate requirements.

Recommendation: APPROVED

KEY FINDINGS & INSIGHTS

1. Sourcing effectiveness: 29 candidates were identified but only 18 were moved to formal screening (62 coverage). Increase screening throughput (target 80 of sourced) or improve upstream triage documentation to ensure promising deals are not left unassessed.
2. Screening impact: 18 companies were screened and all 18 passed to risk assessment (100 pass rate). This either reflects very effective pre-screening or insufficient rigor in the screening filtersconduct an audit of screening criteria and introduce calibrated fail criteria to reduce false positives.
3. Risk assessment outcomes: 16 of 18 companies passed the risk assessment (88.9 success) while 2 failed (11.1). The two UNSAFE companies (DXC Company and FLEET Technologies, Inc.) should be placed on a remediation or exclusion track; prioritize immediate root-cause diligence for these names.
4. Risk concentration: Critical competitive-position risk was flagged for 2 companies (11.1 of analyzed). Competitive risk is a focal concentrationrun deeper market moat analyses for flagged firms and consider position limits or enhanced covenants if proceeding.
5. Portfolio quality: The pipeline at risk stage appears high-quality (88.9 safe). Treat this as a strong base for deployment but avoid complacencysupplement with targeted second-level due diligence (commercial validation, management assessment) before committing capital.
6. Investment viability and execution: For SAFE companies, advance to term-sheet and staged capital deployment with milestones. For UNSAFEflagged companies, require corrective action plans or apply stricter deal terms (warrants, covenants, milestone-based tranches) or remove from consideration.
7. Process KPIs recommendation: Implement and track conversion KPIs across stages (SourcingScreen 62, ScreenRisk 100, RiskPass 88.9). Set targets (e.g., screen 80 of sourced, screening fail rate 1025 to ensure selectivity) and add a competitive-position score to the risk matrix to reduce later-stage surprises.
